

I do not support the proposed change of giving new LPFM stations priority over existing stations. This could affect a genuine, outstanding nationwide (worldwide via internet) radio station from being broadcast in my area.

Air1 is a positive and emotionally uplifting commercial free (listener supported) radio station that gives me an alternative to the poor local selection of stations.

MANY listeners in West Texas would be very disappointed and left thirsty for the kind of music and personalities that are broadcast on the Air1 radio waves.

Please do not disturb this station and others like it that use local translators. Much will be lost.

Thank you.
